

## 5 | CUSTOMIZING YOUR CASELAW SEARCH RESULTS

Fastcase gives you nearly complete control over the way your search results are displayed. You can filter your results, sort your results six different ways, and see further search suggestions for your search.

### Filter Case Results by Jurisdiction , Authority Level, or Document Type

- Easily filter your results down to cases from one jurisdiction using the **Filters** on the left.
- The menus will only contain options that are represented in your search results.
- If you see an option listed on the filter, there is at least one document associated with that option in your search results.

The screenshot shows a search results interface. At the top, it displays "Results: 67.9k". Below this is a search bar with the placeholder text "Search within results..." and a magnifying glass icon. The main filter menu is titled "Jurisdiction" and is divided into two sections: "Circuits" and "States".

**Circuits**

6th Cir. +	671	9th Cir. +	662
11th Cir. +	596	5th Cir. +	596
7th Cir. +	582	8th Cir. +	508
US. +	482	10th Cir. +	468
4th Cir. +	441	2nd Cir. +	326
3rd Cir. +	300	1st Cir. +	299
D.C. Cir. +	110	Fed. Cir. +	16

**States**

Other +	23.3k	CA +	2.98k
NY +	2.17k	TX +	1.82k
IL +	1.72k	OH +	1.20k

Below the "States" section, there are two additional filter options: "Authority Level" (highlighted in green) and "Document Type" (highlighted in purple).

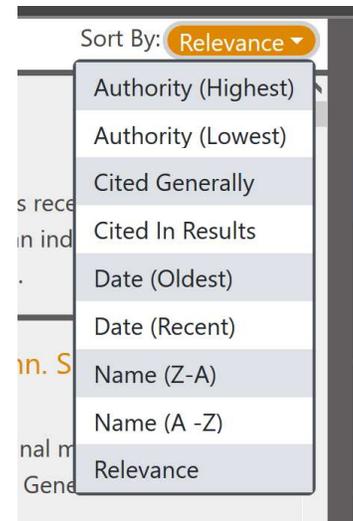

## The Tag Cloud

- The tag cloud is an algorithm that runs in tandem with your search, looking for legal terms of art and other phrases that are present in your relevant documents.
- The displayed terms can then be added as a search term to your current search to focus your search further. Click on the term you are interested in and then select from the two options below:
  - **Include:** the search term must be present in the relevant results
  - **Exclude:** the search term must not be present in the relevant results.
- The size of the term indicates how frequently it appears in the relevant results.

## Sort Case Results to Suit Your Needs

- You have complete control over the way your search results are displayed. Choose the results view that is best suited to your research project.
- To sort results by Relevance score, select **Relevance**.
- To sort in chronological order, select **Date**.
- To sort in alphabetical order, select **Name**.
- To sort by the number of subsequent citations, select **Cited Generally**.
- To sort by the number of subsequent citations within your search results, select **Cited in Results**
- To sort your cases in order of court hierarchy, select **Authority**

## Fastcase Relevance Score

- Fastcase's smart search technology assigns a **Relevance Score** (0%-100%) to each document in your search results based on the search terms used in the query.
- The score is displayed on the left side of the case.
- The purpose of the Fastcase **Relevance Score** is to tell you which documents on your list of search results are more likely to contain a substantive discussion of the search terms you entered. The higher the percentage, the more likely that the document contains a substantive discussion of the topic.
- By default, your search results will be displayed in the **Relevance Score** order (meaning the case with the highest relevance score is at the top of the list).

Current Scope: [Cases](#) Sort By: [Relevance](#)

**Brown v. Evans (N.Y. Sup. Ct., 2010)**  
[🔍](#) [📄](#) [★](#) **Relevance: 28%** | [NY](#) | [State Lower](#) | [Caselaw Opinions](#) | [Aug 9, 2010](#)

## Fastcase Relevance Customization

- Fastcase is the first legal research system to make our relevance algorithm transparent and modifiable by you the user.
- To view the settings, click on **Options**, then click on **Advanced**.
- The purpose of each of the sliders displayed is to adjust how much impact the different factors in the algorithm have in the content. Adjusting the factors does not change what documents are shown, but does change what order the documents are shown in when sorted by Relevance. The factors are:
  - **Document properties**
    - **Responsiveness:** Documents that have the search terms close together are preferred.
    - **Importance:** Cases that are cited many times are preferred.
    - **Authority:** Cases from sources of higher authority are preferred.
    - **Date:** More recent cases are preferred.
  - **Document Usage**
    - **Frequently Read:** Favors documents that are read more often by Fastcase users.
    - **Frequently Favorited:** Favors documents that are saved more often by Fastcase users.
    - **Frequently Printed:** Favors documents that are printed more often by Fastcase users.
    - **Frequently Emailed:** Favors documents that are emailed more often by Fastcase users.
- You can set up a combination that meets your preferences, or use the default settings.

The screenshot shows the 'Search Options' interface. At the top, there is a search bar with 'Search Fastcase' and a magnifying glass icon. Below the search bar, there are filters for 'New Scope' (MD, US, 4th Cir., D. Md.) and a 'Sort By' dropdown set to 'Relevance'. The main content area is titled 'Customize your Relevance Algorithm' and includes a 'Reset to Default' button. A sidebar on the left lists 'Search Terms', 'Search Scope', 'Saved Scopes', and 'Advanced' (which is highlighted). The main content area is divided into two sections: 'Document Properties' and 'Document Usage'. The 'Document Properties' section has four sliders: 'Responsiveness' (set to 8), 'Importance' (set to 7), 'Authority' (set to 5), and 'Date' (set to 0). The 'Document Usage' section has one slider: 'Frequently Read'.

Factor	Description	Value
Responsiveness	Favors documents that have many of your search terms close together.	8
Importance	Favors documents that have been cited many times.	7
Authority	Favors documents from sources with greater precedential value, like supreme court decisions or constitutions.	5
Date	Favors more recent documents.	0
Frequently Read
