Type Ahead

Type ahead is a predictive algorithm that makes suggestions for any term that you enter into any search window in Fastcase. As you enter letters, Type ahead will make suggestions for search phrases and specific documents based off of what information you have already entered. Just click on one of the suggestions to run that search.

2 | SEARCH TECHNIQUES

Search Methods

There are three ways to search for cases on Fastcase: by **Keyword**, **Natural Language** or **Citation Lookup**.

Keyword Search (with Boolean operators)

Searching by **Keyword** using Boolean operators is the most powerful and flexible way to search for electronic information. It is also very easy to use. Fastcase uses the standard Boolean operators described below:

OPERATOR	EXAMPLE	DESCRIPTION
AND, &	copyright AND preemption	Results must contain <i>both</i> the words “copyright” and “preemption”
OR	landlord OR lessor	Results must contain <i>either</i> the word “landlord” <i>or</i> the word “lessor.” (They may contain both words).
NOT	vehicle NOT car	Results <i>must contain</i> the word “vehicle” but <i>must not contain</i> the word “car.”
w/3, /3	capital w/3 punishment	Results must contain the word “capital” within 3 words of the word “punishment.” The number indicates the maximum distance apart for the terms.
, !	litig	Results must contain some variation of the stem “litig” such as litigation, litigated, litigator, etc.
?	advis?r	The ? works as a single letter wildcard. Results must contain some variation of the word advis_r, such as adviser or advisor.
“ ”	“felony murder”	Results must contain the precise phrase “felony murder.”
()	(security OR pledge) AND assignment	Parentheses are used to define the order of operations when you use multiple Boolean operators.

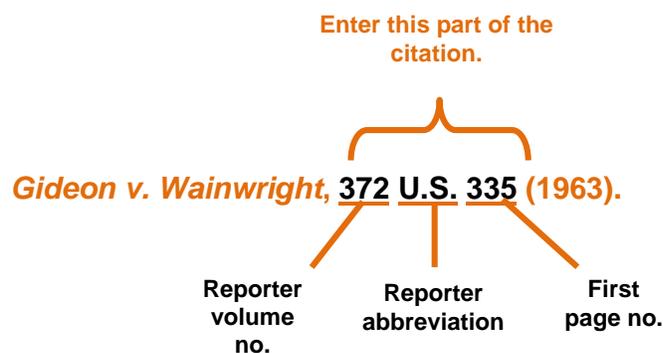

Examples of the operators are also visible in the **Boolean Search Tips** box on the [Options](#) page.

Here are a few more things to keep in mind when you are performing a keyword search on Fastcase:

- Our search engine automatically omits certain common words (e.g., the, it, etc.) from your query. The search runs more efficiently without these common “noise” words.
- Fastcase uses an “implied AND” operator. This means that if there are multiple words in your search query and you do not specify a Boolean operator to connect them, Fastcase will treat your search as if you had placed an “AND” between each term. For example, if you type: summary judgment order, Fastcase will read that as: summary AND judgment AND order. Only cases containing ALL of those terms will be returned as results. If you would like to search for cases that contain the exact phrase “summary judgment order” (where those three words will appear in documents directly next to each other and in the same order), you should put the phrase in quotation marks.
- At the moment, our search engine will accommodate a search up to 500 words long. For the purposes of search length, a Boolean operator counts as a word.

Citation Lookup

- Pull up a case using the reporter citation by entering the reporter volume number, the reporter abbreviation, and the first page number.

Natural Language Search

Natural language searches are much less precise than **Keyword** searches, but they are a good place to start if you are new to legal research, or if you are delving into a new area of the law. There are a few important aspects of a **Natural Language Search** that you should bear in mind:

- The results are the cases with the highest relevance scores based on your overall mix of search terms.
 - Your search results may not contain each and every one of your search terms.
-

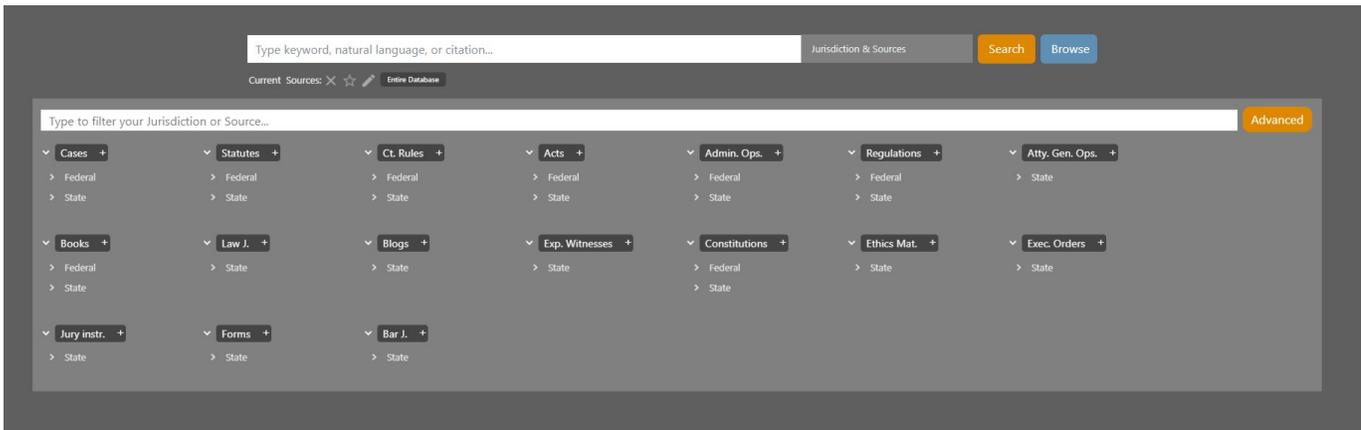

3 | SEARCH OPTIONS

Selecting a Specific Jurisdiction Before Running Your Search

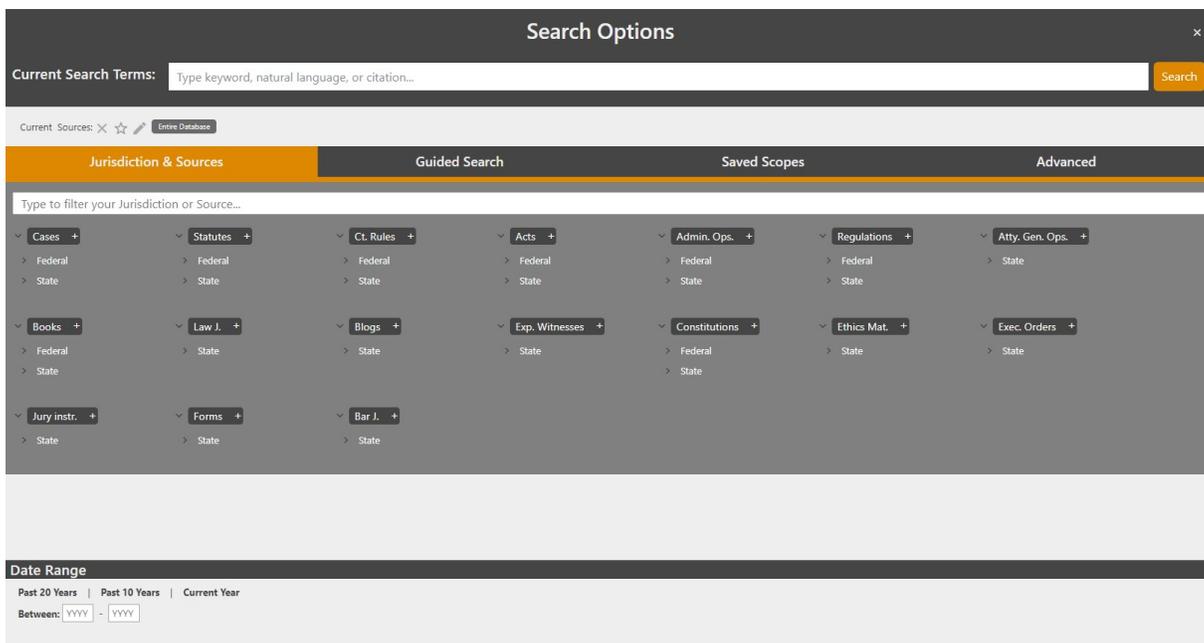

- Click on the **Jurisdiction & Sources** button.

- You can then select a library one of two ways: **Jurisdiction or Document Type**.

- Click on the document type to filter by document type.
- Type a jurisdiction to filter by jurisdiction, then select the specific jurisdiction that you are interested in.
- You can select as many libraries as you would like and you can select libraries across different levels and jurisdictions.
- Once selected, the current libraries will show next to the Current Scope button at the top of the Jurisdiction Selection menu.
- You can also adjust what types of materials to exclude in your search results by clicking on "Advanced"

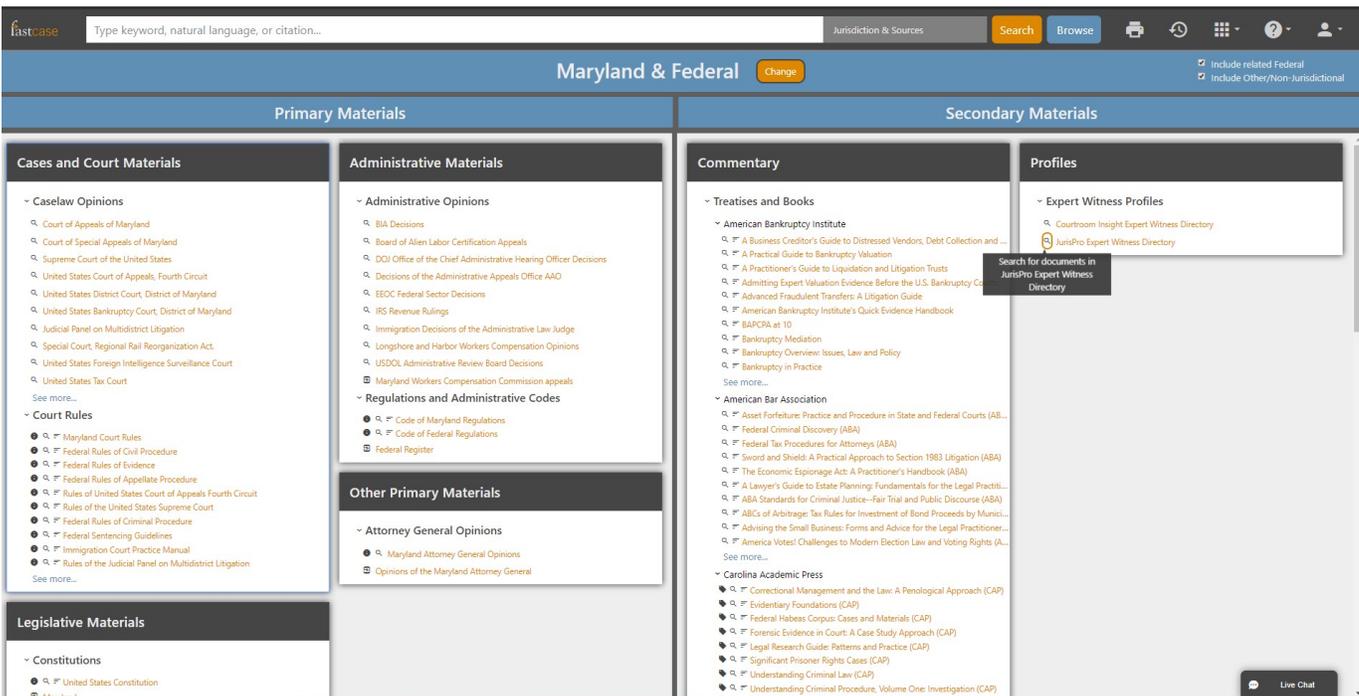

Browse Documents Using Outline View

In addition to searching, Fastcase also allows you to browse primary and secondary content in our **Outline View**

- To get started, click on the **Browse** button

- This will display your default jurisdiction. Once you have selected a jurisdiction, you will can then select the document type you are interested in viewing.

- Once you have selected a document type, you will see the outline for that particular document.
- Navigate through the outline by clicking on the drop down buttons next to the section you are interested in.

4 | VIEWING DOCUMENTS

View the Full Document Text

- After you successfully perform a search, you are taken to the results screen listing the search results based on your search query.
- To access the full text of a document from the search results list, click on the orange hyperlinked heading of the document.

Navigate Within a Document

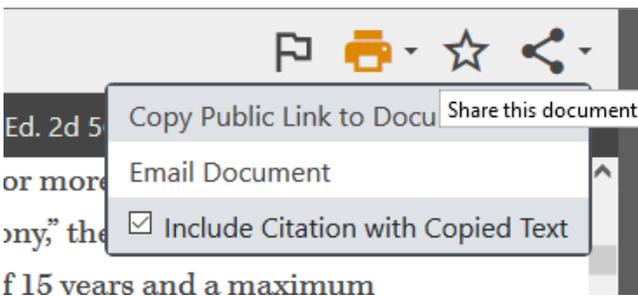

Use the navigation buttons to navigate within a document.

- Jump to the paragraph with the densest concentration of search terms by clicking the center button that looks like a document.
- Jump to the next search term by clicking the right button.
- Jump to the previous search term by clicking the left button.

Copy and Paste

Fastcase can help you save time drafting legal briefs and other pleadings with handy copying tools.

- When you copy the text of the document you are viewing to your clipboard, by default Fastcase will attach the citation of a case.

-You can change that setting by clicking on the **Share** button at the top right of the screen.

- Next, open the brief or pleading that you are working on in the appropriate word processing program (e.g., MS Word or Word Perfect).
 - Then use your program's paste function to paste the text into your document. If you are using MS Word, you can paste using the shortcut **Ctrl+V**.

The Tag Cloud

- The tag cloud is an algorithm that runs in tandem with your search, looking for legal terms of art and other phrases that are present in your relevant documents.
- The displayed terms can then be added as a search term to your current search to focus your search further. Click on the term you are interested in and then select from the two options below:
 - **Include:** the search term must be present in the relevant results
 - **Exclude:** the search term must not be present in the relevant results.
- The size of the term indicates how frequently it appears in the relevant results.

You can also see the tag cloud in list format. The term that is at the top of the list is most frequently appearing, while the term that is at the bottom of the list appears least frequently.

Sort Case Results to Suit Your Needs

- You have complete control over the way your search results are displayed. Choose the results view that is best suited to your research project.
- At the top of the results list are the headers for the columns of information. Click on the header to sort cases per that category. Documents can be sorted by:

Fastcase Relevance Score

- Fastcase's smart search technology assigns a **Relevance Score** (0%-100%) to each document in your search results based on the search terms used in the query.
- The score is displayed on the left side of the case.
- The purpose of the Fastcase **Relevance Score** is to tell you which documents on your list of search results are more likely to contain a substantive discussion of the search terms you entered. The higher the percentage, the more likely that the document contains a substantive discussion of the topic.
- By default, your search results will be displayed in the **Relevance Score** order (meaning the case with the highest relevance score is at the top of the list).

Fastcase Relevance Customization

- Fastcase is the first legal research system to make our relevance algorithm transparent and modifiable by you the user.
- To view the settings, click on **Jurisdiction and Sources**, then click on **Advanced**.
- The purpose of each of the sliders displayed is to adjust how much impact the different factors in the algorithm have in the content. Adjusting the factors does not change what documents are shown, but does change what order the documents are shown in when sorted by Relevance. The factors are:
 - **Document properties**
 - **Responsiveness:** Documents that have the search terms close together are preferred.
 - **Importance:** Cases that are cited many times are preferred.
 - **Authority:** Cases from sources of higher authority are preferred.
 - **Date:** More recent cases are preferred.
 - **Document Usage**
 - **Frequently Read:** Favors documents that are read more often by Fastcase users.
 - **Frequently Favorited:** Favors documents that are saved more often by Fastcase users.
 - **Frequently Printed:** Favors documents that are printed more often by Fastcase users.
 - **Frequently Emailed:** Favors documents that are emailed more often by Fastcase users.
- You can set up a combination that meets your preferences, or use the default settings.

6 | PRINTING & DOWNLOADING DOCUMENTS

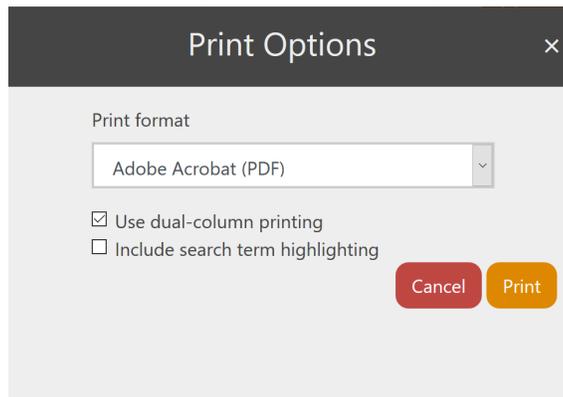

Fastcase gives you the ability to save and print clean, professional-looking documents in single- or dual-column format.

Printing a Single Document

- Click the **Print** icon on your toolbar. Then click "print now".

- Make your formatting selections:
 - Choose whether to highlight search terms.
 - Choose single- or dual-column formatting.
 - Choose a file format: Microsoft Word (DOC) or Adobe Acrobat (PDF).

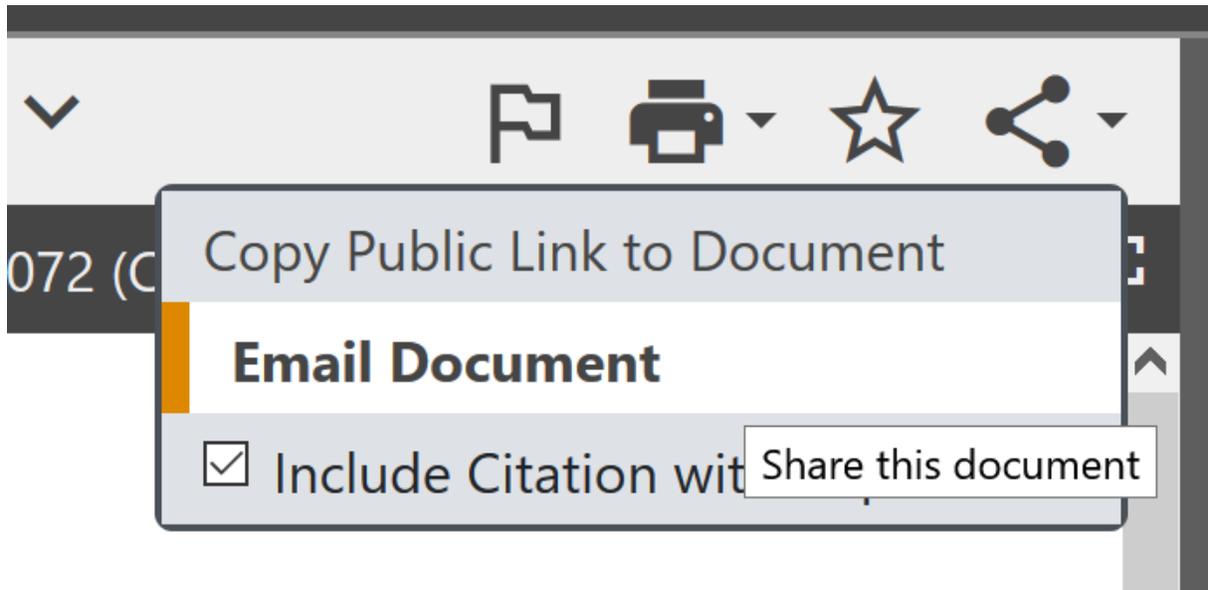

- Click the **Print** link. Your browser will begin to download the file onto your computer.
 - Once the download is complete, open the file using the appropriate application for the file format you selected.
 - Now you can print and/or save the file like any other document on your computer.
-

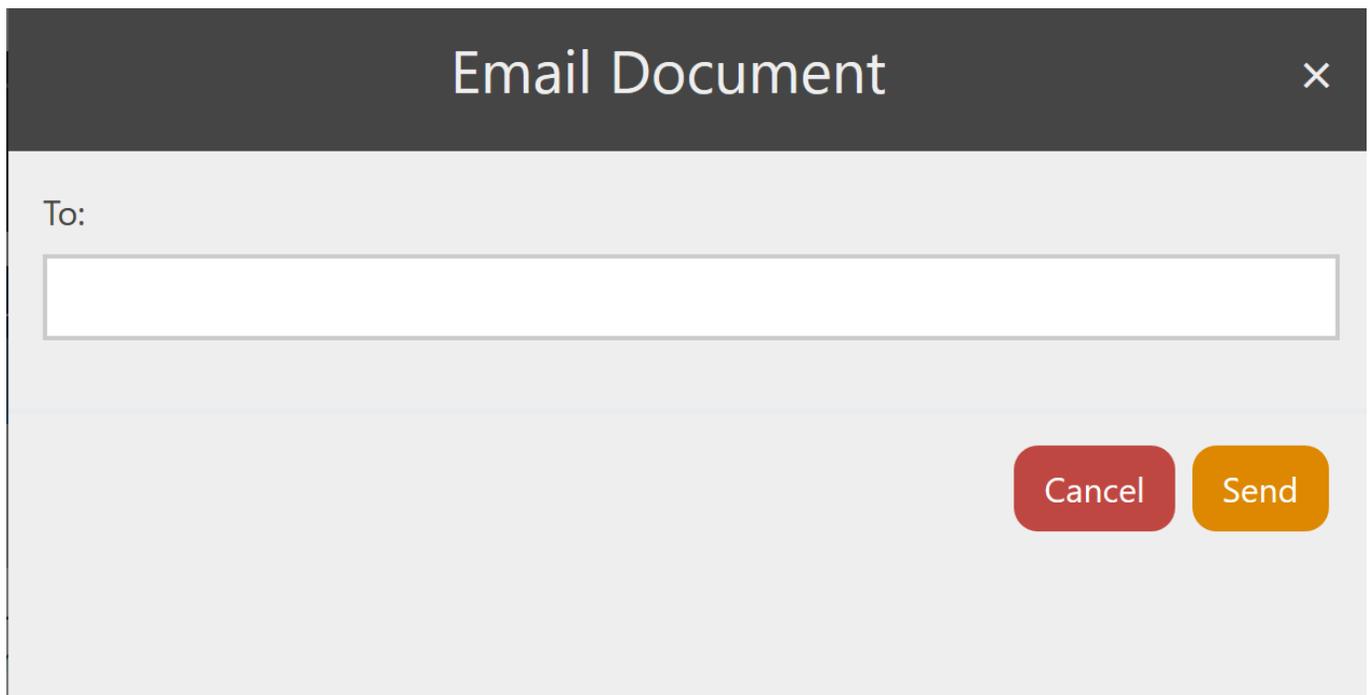

Email a Case

Fastcase allows you to email a document to any email address with just two clicks.

- Start by clicking on the **Share** link on the toolbar when you are viewing a document. Then select **Email Document**.

- Enter the email address you would like the document sent to.
- The document you selected will be sent in rich text format within the body of the email.
- **Note:** You can also download the case using the **Print** button and then email it as an attachment.

8 | USING AUTHORITY CHECK

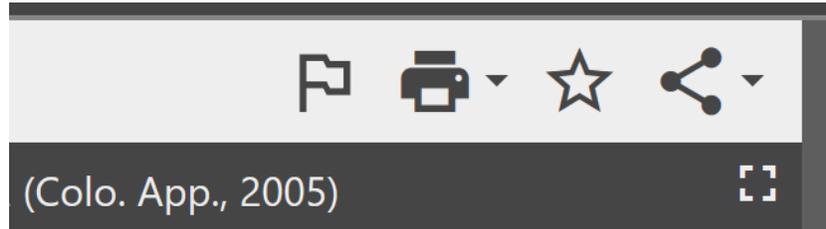

Overview

Authority Check is Fastcase's integrated citation analysis tool. You can use **Authority Check** in many ways, including:

- To generate a list of later citing cases to find related authority on your topic.
- To prioritize your research by identifying the most frequently cited cases within your list of results.

Generate a List of Later Citing Cases

 **Bad Law Bot - what other courts have said about this case**

Bad Law Bot is an algorithmic citator. It checks through all of the cases that cite to this one, and identifies any mentions of negative history. Below you'll find cases that indicate this one is no longer good law, followed by all of the other citing cases.

State v. Warner (Tenn. Crim. App., 2018)
  [Case Law](#) | [May 9, 2018](#)

The United States Supreme Court stated that "good faith" is defined as "[t]he lengths to which the prosecution must go to produce a witness . . . [and] is a question of reasonableness." ***Ohio v. Roberts*, 448 U.S. 56, 74 (1980), abrogated by Crawford v. Washington, 541 U.S. 36 (2004)**. "The ultimate question is whether the witness is unavailable despite good-faith efforts undertaken prior to trial to locate and present that witness. As with other evidentiary proponents, the...

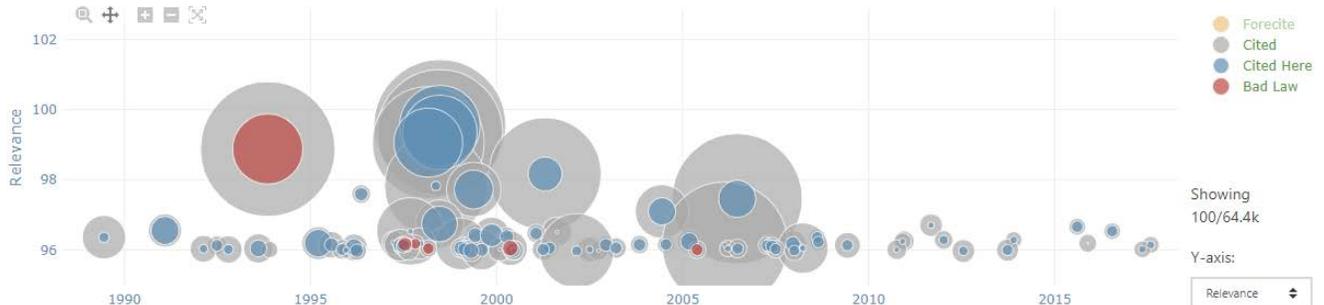

Bad Law Bot finds negative citation history by taking all the cases that have cited *Roberts* and examining how they've cited to *Roberts*. If a court has negatively cited to *Roberts*, **Bad Law Bot** will link you to that case. Keep in mind that **Bad Law Bot** determines negative case history by using algorithms, so the report is constantly updating.

9 | USING THE INTERACTIVE TIMELINE

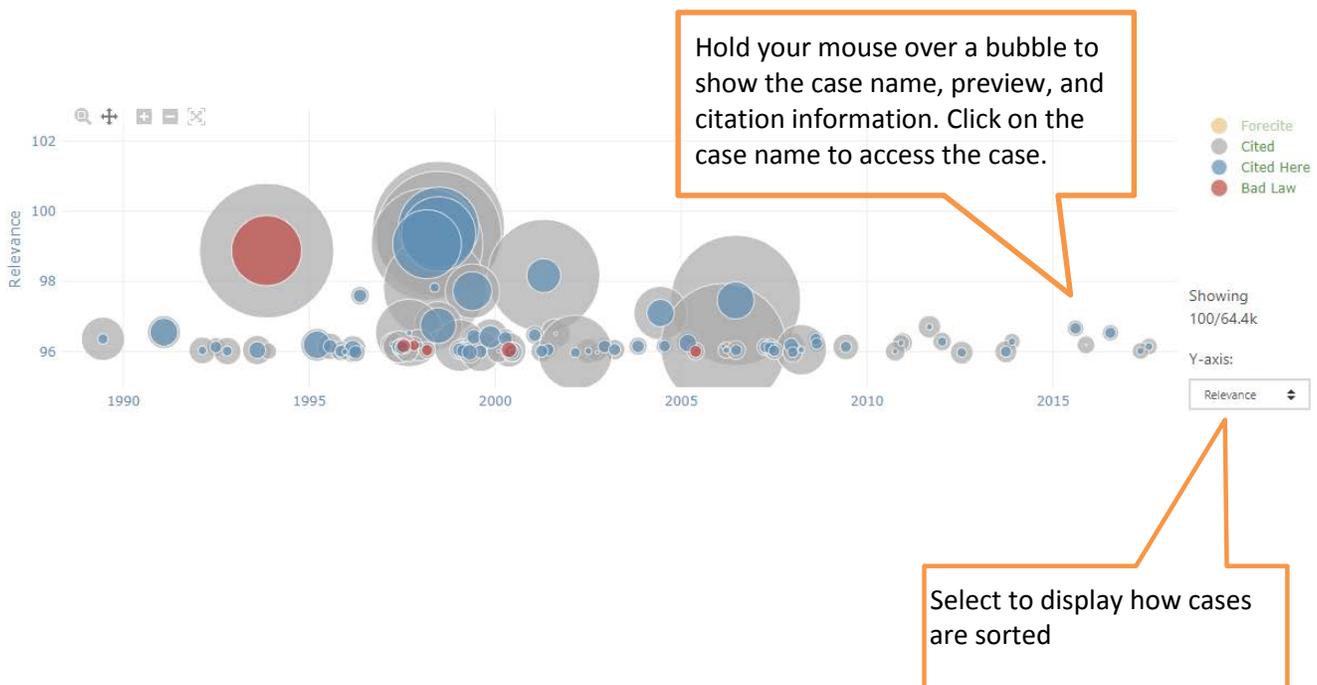

The **Interactive Timeline** is a powerful data visualization tool unique to Fastcase. By allowing you to view up to four different attributes of each case at a time, your search results jump off the page.

Reading the Timeline

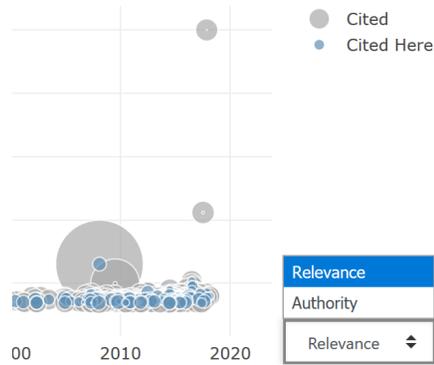

- To access the **Interactive Timeline**, start by running a search and viewing your search results. On the bottom of the results page you will see the **Interactive Timeline**. By default, your timeline will be in **Relevance View**.

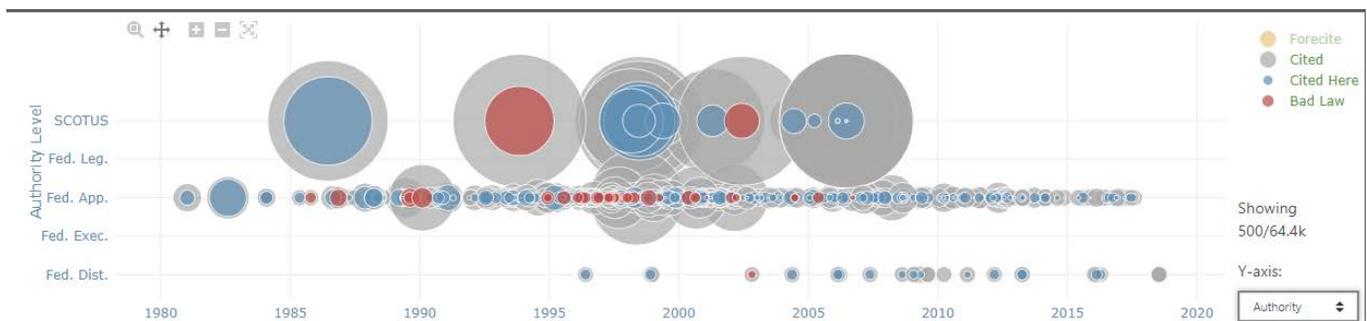

- Each case in your search results is represented on the **Interactive Timeline** by a gray circle.
- The **Interactive Timeline** tells you at least four things about each case:
 - The date of each decision (x-axis).
 - The **Relevance Score** of each decision (y-axis).
 - The number of times each case was cited overall (diameter of gray circles)
 - The number of times each case was cited for your search terms (diameter of blue circles).
 - The red circle indicates that a case has negative interpretation and is no longer considered good case law.

- You can switch to **Court Level View** by selecting Authority from the **Vertical Axis** filter.

- This time, your timeline will look something like the image below:

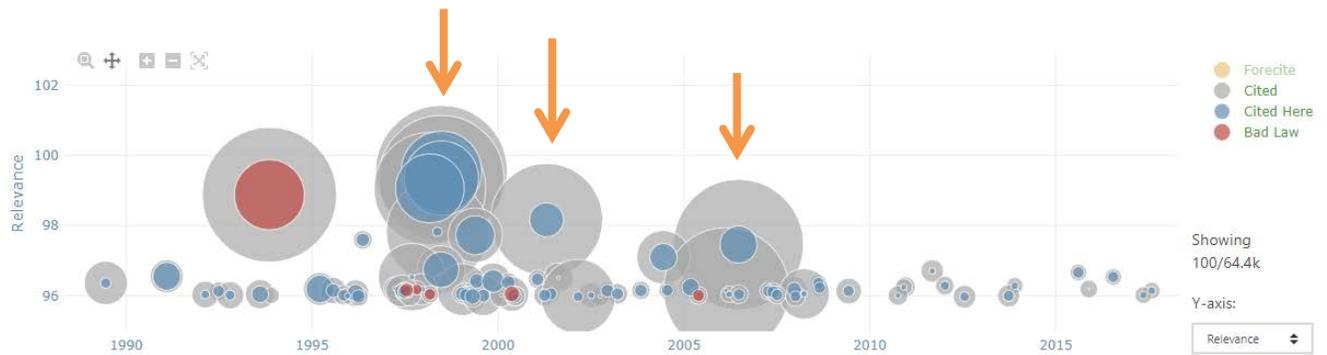

- Now you can see the court level of each decision (y-axis).

Identifying Authoritative Cases

By illustrating how relevant each case is based on your search terms, how many times each case has been cited by subsequent cases, the **Interactive Timeline** quickly identifies seminal and authoritative cases.

- For the best results, first make sure that you are in **Relevance View**.
- Then look for cases with large diameters that appear towards the top of the page since frequently cited cases with high **Relevance Scores** are the most likely to be authoritative.

- Here is an illustrative example: if you perform a keyword search for "sexual harrassment" and open the **Interactive Timeline** in **Relevance View**, you will see something that looks like this:

- It is easy to spot authoritative cases on the timeline – look for circles with large blue and gray diameters as well as circles that appear higher up than other contemporaneous cases.
- On the timeline pictured above, these three cases – all key sexual harrassment cases– stand out.

10 | USING FORECITE

When you perform a **Search** on Fastcase, **Forecite** goes the extra mile and identifies important cases that can easily be missed by ordinary keyword searches. **Forecite** enhances your ordinary search result by carefully and comprehensively analyzing the citation structure of each case in your results list. It looks for decisions that are frequently cited by other decisions in your search results but do not contain all of your search terms. **Forecite** will notify you of these additional cases at the top of the results page.

- Start by performing a **Search**.
- On the results screen, at the top of the **Suggested Results** panel on the right will be the **Forecite** results.

Connect to Clio

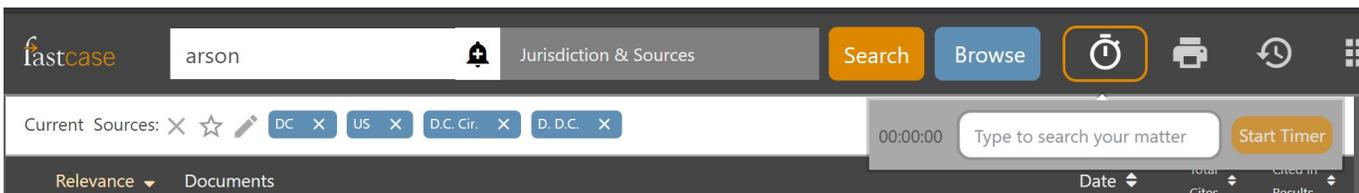

If you use Clio's Cloud-Based Practice Management Software you can link your Clio account to Fastcase to quickly record billable hours as you research.

From within Fastcase, select **Connect to Clio** from the **Apps and Tools** menu. You will be redirected to the Clio site and prompted to login. Click the large green button that reads **Yes, Let's Connect**.

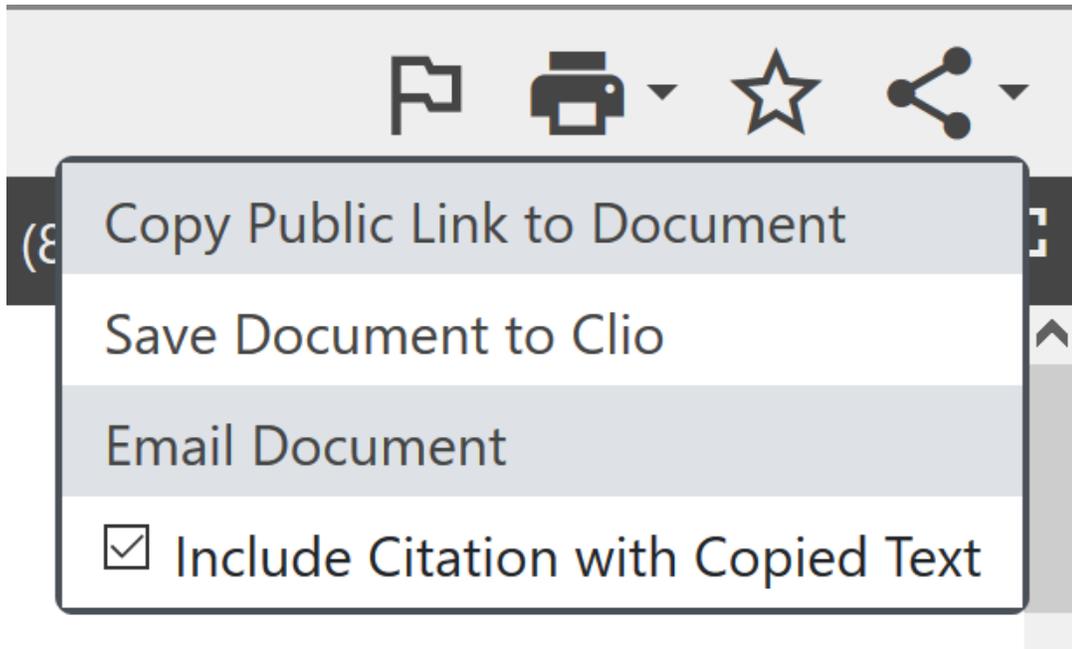

Track Your Billable Research Time

When you connect your Clio account to Fastcase, you will see a "stopwatch" icon. This timer will allow you to select different Clio matters and set a timer for each client as you work. Start the timer by clicking the orange "start timer" button. Clicking the stop button will automatically save your billable research time to Clio.

Saving a Document to a Matter in Clio

You can also save a document directly from Fastcase into a matter in Clio. Simply click on the **Share** icon in the upper right corner of the screen.

You can then select a document format as well as which matter you would like to save the document to.

A screenshot of the "Save to Clio" dialog box. The dialog has a title bar with "Save to Clio" and a close button. Below the title bar, there is a "Print format" section with a dropdown menu set to "Adobe Acrobat (PDF)". There are two checkboxes: "Use dual-column printing" (checked) and "Include search term highlighting" (unchecked). Below these is a "Matter:" label followed by a text input field containing "00005-Wilson". At the bottom right, there are two buttons: "Cancel" (red) and "Save" (orange).
